## About the ACCEPT project

### The **Core Capabilities**

### **Framework** for supporting

autistic people tells staff

what they need to know

about autism

You can read the Core

Capabilities Framework on

the internet. [If you would](#)

[like to read this information](#)

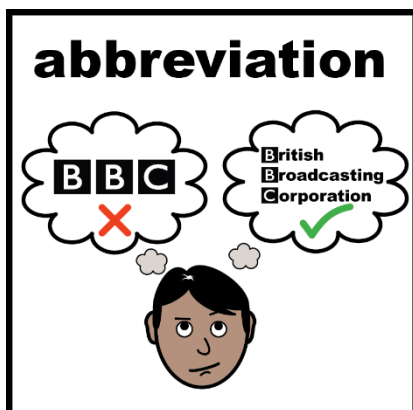

[click here](#)

We call the Core

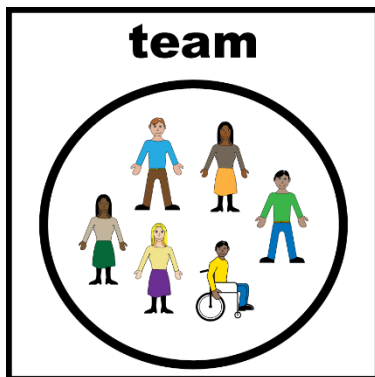

Capabilities Framework the

CCF.

We wanted to know how people use the **CCF**

We had lots of people in our team to help us. We had:

- Autistic people
- Staff who teach about autism

We worked with big organisations:

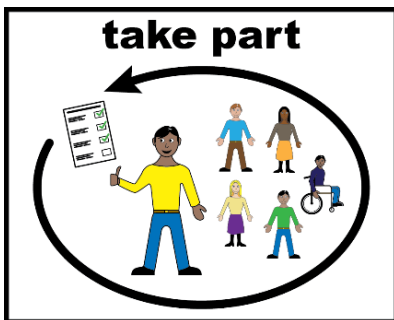

- [Autistica](#)
- ESTIA centre
- [National Autistic Society](#).

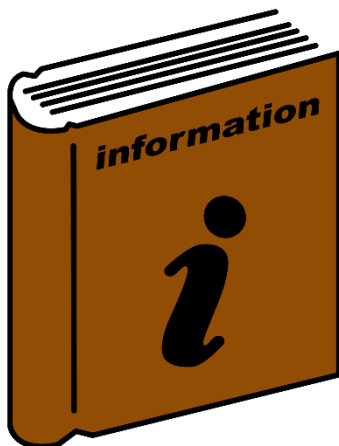

We talked to lots of people from around the UK

400 people took part in our project

We made a [list of all the autism training](#) in the UK that uses the CCF.

[You can read the easy read summary here](#)

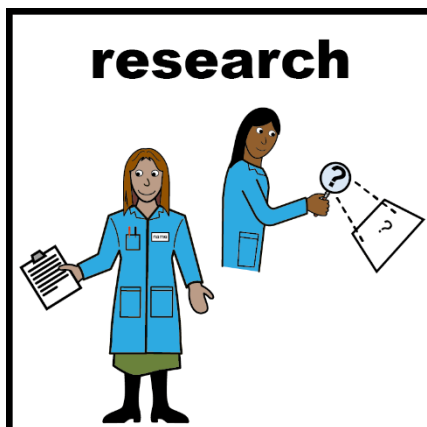

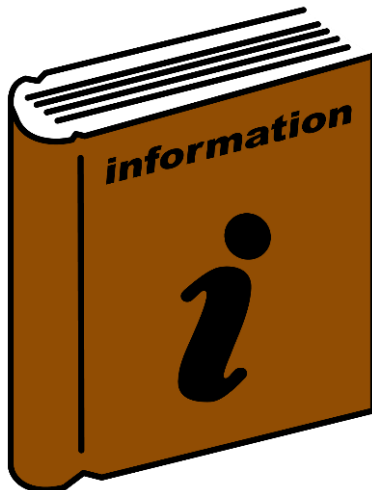

We checked the training.  
Some of the training did not have all the right things.

We found lots of things [missing](#) from **training** that

could make it better

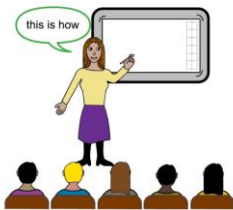

you can read the [easy](#)

[read document](#) here

We did some research to find out what experts think about autism training.

**training**

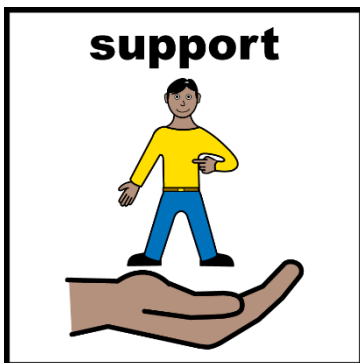

We wanted to see if autism **training** makes health staff better at working with autistic people.

**give feedback**

Experts told us more things need to be in the autism training to make it better.

**support**

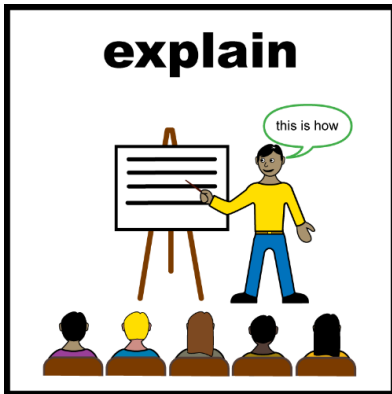

This will make health staff better at working with autistic people.

**event**

We did a Zoom **conference** about the project.

We told everyone what we did and what we learnt

You can watch the Zoom [conference by clicking here](#)

### Glossary

Word	Meaning
Training	Teaching skills or behaviour
Zoom Conference	An online meeting with lots of people
