About the ACCEPT

project

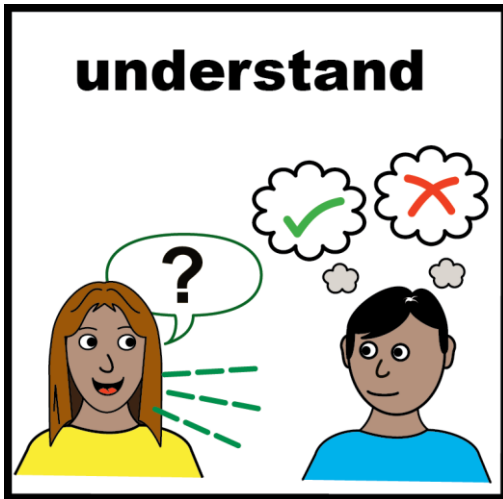

The Core Capabilities Framework for supporting autistic people tells staff what they need to know about autism

If you would like to read the [Core Capabilities Framework](#) [click here](#)

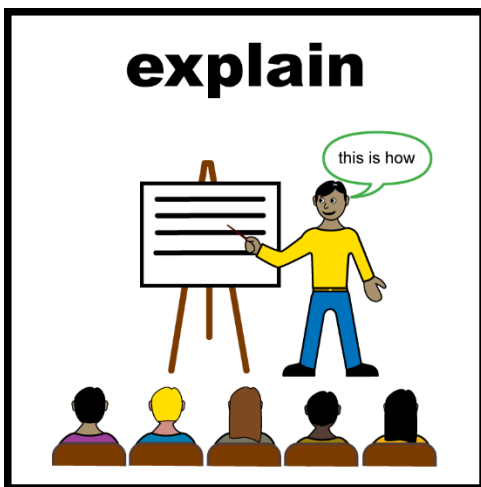

We call the Core Capabilities framework the CCF have shortened core capabilities framework to CCF

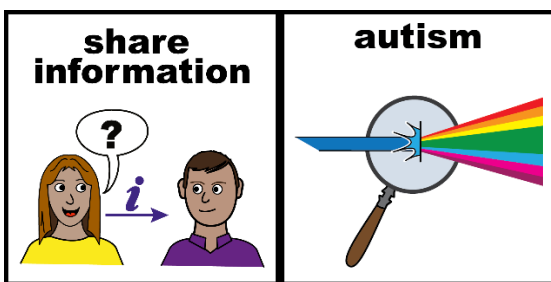

Gap Analysis

We wanted to know what is missing from autism **training**

So that we could make explain how to improve autism **training**

What we did

We spoke to lots of people about autism training.

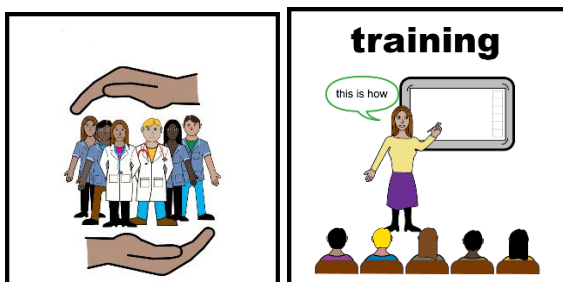

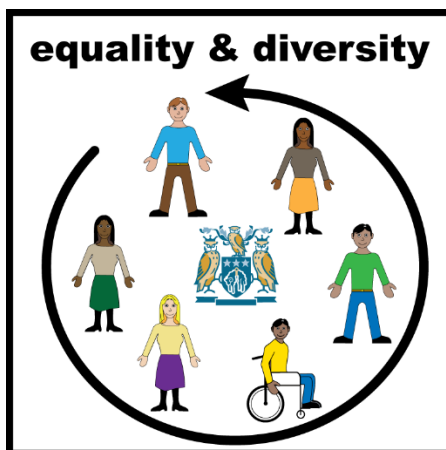

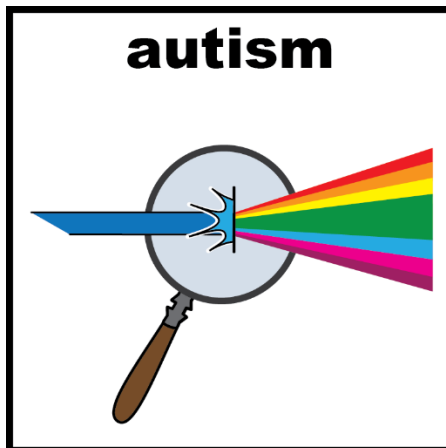

We asked people what needs to be in autism training and what people

should know about
autism

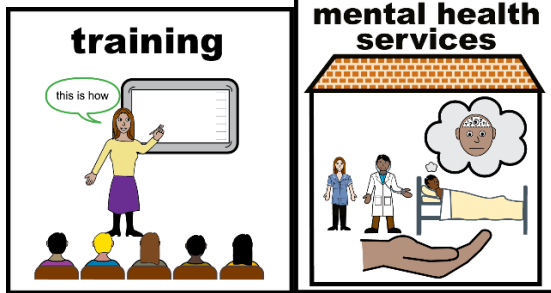

What we found

Autism **training** should
have information about

- how to talk to autistic people.
- Autism in children, teenagers, adults and old people
- suicide
- sleep
- Being treated fairly
- ethnicity

More **training** is needed
for **health staff**

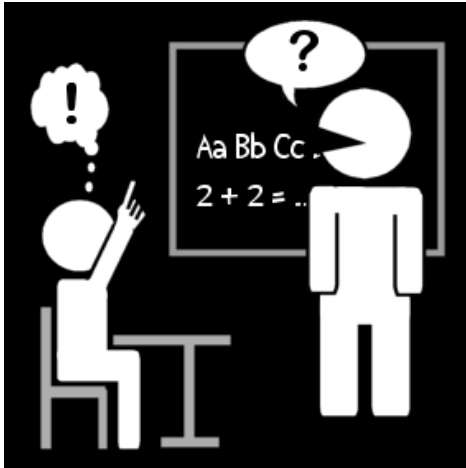

More **training** is needed
for **mental health staff**

Some staff find it hard to
find **training**

Autistic people should be
involved in **training**

Autism **training** include
interactive learning

We need to find out if
autism training makes
care better for autistic
people

Glossary

| Word | meaning |
|-----------------------------|---|
| Training | Teaching a person or people a skills or behaviour |
| Interactive learning | Teaching using social media, computers and the internet |

| | |
|----------------------------|--|
| mental health staff | <ul style="list-style-type: none">• nurses• psychiatrist• psychologists who work in mental health hospitals or the community |
| health staff | <ul style="list-style-type: none">• doctors• nurses• occupational therapists that work in a hospital or community setting |
